RE: Phase I: Preservation of Manuscript Records & Archival Digitization of Plat Records

Dear Hon. Jennifer Lindenzweig,

This proposal amends Hunt County Clerk's quote for the Preservation of Real Property Records & Archival Digitization of Plat Records dated December 15, 2016, revising a Phase 1 to include up manuscript records and plats up to \$700,000.00. This proposal is presented by Kofile Technologies, Inc. (Kofile) f/n/a Kofile Preservation, Inc.

PROJECT OVERVIEW

This project is presented via TXMAS Contract No. **TXMAS-13-36010** per Hunt County's cooperative purchasing membership. **Please reference this contract number on the resulting purchase order.**

COUNTY ACCEPTANCE—PHASE ONE

- ▶ Without a signed Agreement, prices are good for 90 days. Upon approval, pricing remains firm for the contract term.
- ▶ Pricing is based on a Good Faith Estimate of page counts. Billing will occur on actual counts based upon agreed upon unit pricing; not to exceed the P.O. with written authorization from the County.
- ▶ If the County does not purchase the preservation services for the inventory in its entirety, then the pricing will be amended to provide adequate shelving for the specific inventory range.

Records receive the following services as identified. A permanent log is created for each volume to record condition, page order, and services/treatments performed. A final quality check references this log sheet.

Volumes Only

PRV—Preservation (Conserve, Treat, Deacidify, Encapsulate, Rebind, & Archival Storage Solution)

- Surface clean sheets to remove deposits—including dust, soot, airborne particulate, sedimentation, insect detritus, or even biological/mineral contaminants.
- Remove non-archival repairs or fasteners, such as residual glues, to the furthest extent possible without causing damage to paper and inks.
- Humidify and flatten sheets. Monitoring eliminates ink bleeds and mold or fungus growth. Flattening occurs with the strictest archival environmental controls.
- Mend tears with archival, acid free, and reversible materials—either Japanese tissue and methyl cellulose adhesive or Filmoplast® (acrylic-based, heat-set tissue).
- Deacidify sheets after careful testing with Bookkeepers® magnesium oxide to neutralize acidic inks and paper by providing an alkaline reserve. Random testing ensures an 8.5 pH with a deviation of no more than $\pm .5$.
- Encapsulate each sheet in a Lay Flat Archival Polyester Pocket™ composed of SKC Films, Skyroll SH72S® Mylar. Pocket dimensions match the "book block" dimensions, with a 1¼" binding margin.
- Rebind in a custom-fitted and stamped Disaster Safe County Binder™ (DSB). Each is manufactured on a per-book basis and are sized to ¼" incremental capacities. Volumes may return split or combined depending on page counts and the additional weight of the Mylar encapsulation. Index tabs are repaired or replaced, as necessary. A dedication and treatment report is included in the binders.

Plats Only

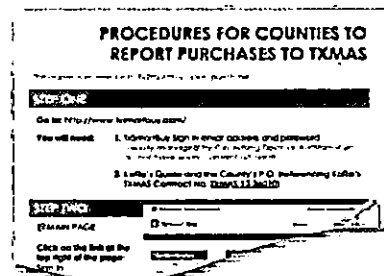

IM—Archival Imaging (Image Capture, Clean Up, & Zonal Enhancements)

- Capture images at a minimum of 300 dpi at 256 gray levels, ensuring the highest quality for poor contrast and readability. Gray-scale ensures optimum resolution.
- Images accumulate as Group IV bi-tonal images in a standard TIFF or PDF format.
- Kofile's IMAGE PERFECT application software uses custom image clean up and enhancements such as deskew, despeckle, character repair, and zonal processing.
- Images are indexed (named) by Book, Volume, and Page.
- Effectiveness and minimum legibility is verified through rigorous and systematic quality control. **Each image is certified and sight checked** to ensure there are no missing pages, double feeds, and to account for "A" pages (added to the original).
- The County receives one MASTER COPY (DVD or CD), and one COPY.
- Kofile can hold a security copy of all digital images for safekeeping. Kofile does not sell, distribute, or grant unauthorized access to County records.
